EXPERIENCE

No country Tech (internship) - present

Position: Front-end developer

- Development of E-commerce, using agile methodologies (SCRUM).
- Front-end development of the site, designing components, styling.
- Contribution to the back-end development of the application.

PROJECTS

Wheather app

- This is a project, that uses the user's location and delivers the weather forecast in their area, it also has a city search engine to access their climates.
- Technologies used: Javascript, react, redux and css.

[Click here to see the website](#)

Connect 4

- I recreated the connect 4 game from scratch, it contains two game modes, player vs player and player vs machine.
- Technologies used: Javascript, react, and css

Gym website

- This is a small demonstration of my FrontEnd skills, the idea was to recreate the website of a popular gym in my area but with different color palettes and fully responsive
- Made with React and CSS.
